

```
public class Operators {

    public static void main(String[] args) {

        // Operator is a special symbol which is used to perform
        operation on an operand

        // 1. Unary, 2. Binary, 3. Ternary
        // Unary--> Increment and Decrement
        // Binary-->

        // Types: 1. Arithmetic, 2. Assignment, 3. Logical, 4.
        Relational, 5. Bitwise

        // Ternary --> variable = condition ? {true}result1 :
        {false}result2

    }

}
```
