SUMMARY:
MERN Stack Engineer with a passion for creating scalable and efficient web applications.

TECHNICAL SKILLS:
FRONTEND: JavaScript, TypeScript, React.js, Redux
BACKEND: Node.js, Express.js
DATABASE: MongoDB, MySQL
DEVOPS: Docker, AWS

EXPERIENCE:

Senior Software Engineer – Pegasus Infocorp (IDBI Intech Ltd) | August 2022 – August 2023
- ➢ Contributed to the development and enhancement of different projects including iRecon, iDMS, iHRMS, etc. Where I've also learnt a lot about the backing domain.
- ➢ Effectively communicated project progress, challenges, and solutions to stakeholders, ensuring transparency and alignment throughout the project lifecycle.

- *iRecon* – This project is based on the reconciliation process which is being conducted by every bank on the next day of the transaction, to find out the number of successful and unsuccessful transactions and the reason of the failure.
- *iDMS* – This is also being used by every bank to solve the disputes of transactions raised by the customers. The customers can raise the dispute over a completely successful transaction and then iDMS find out the raised dispute is correct and customer is given the chargeback of the amount by the bank.
- *iHRMS* – The well-known project of all the organizations. I was working on the Leave Module of the iHRMS which works on the calculation of leaves of the employee based on the policy of the organization.

Software Engineer – Career Infotech | April 2021 – July 2023
- ➢ Actively engaged in peer code reviews, debugging, promoting code quality, consistency, and adherence to coding standards.

- *Developer School* – This project was built for a client with Educational Domain, to manage the entire institute.
