TECHNICAL SKILLS:

FRONTEND: JavaScript, TypeScript, React.js, Redux
BACKEND: Node.js, Express.js
DATABASE: MongoDB, MySQL
DEVOPS: Docker, AWS

EXPERIENCE:

Senior Software Engineer – [Pegasus Infocorp]([IDBI Intech Ltd]) | August 2022 – August 2023

- *iRecon* – This project is based on the reconciliation process which is being conducted by every bank on the next day of the transaction, to find out the number of successful and unsuccessful transactions and the reason for the failure.
- *iDMS* – This is also being used by every bank to solve the disputes of transactions raised by the customers. The customers can raise the dispute over a completely successful transaction and then iDMS finds out the raised dispute is correct and the customer is given the chargeback of the amount by the bank.

Software Engineer – [Career Infotech] | April 2021 – July 2022

- ➢ Actively engaged in peer code reviews, debugging, promoting code quality, consistency, and adherence to coding standards.
- ➢ *HRMS* – The well-known project of all the organizations. I was working on the leave module, where the calculation of leaves of the employee is done based on the policy of the organization.

Projects – Learning Point| September 2023 – February 2024

- ➢ *Developer School* – This project was built for a client with Educational Domain, to manage the entire institute.
  - o We built the project from scratch with a team of 4.
  - o Was there in the entire development till the deployment of MVP.
- ➢ Effectively communicate project progress, challenges, and solutions to stakeholders, ensuring transparency and alignment throughout the project lifecycle.
